

Список публикаций официального оппонента

Вахрушева Александра Васильевича,
соответствующих специальности 1.2.2

1. Vakhrushev, A., Fedotov, A., Sidorenko, A. Simulation of multilayer nanosystems interface formation process for spintronics // Key Engineering Materials. – 2021. – 888. – pp. 57-65. DOI: 10.4028/www.scientific.net/KEM.888.57
2. Fedotov, A., Vakhrushev, A., Severyukhina, O., Sidorenko, A., Savva, Y., Klenov, N., Soloviev, I. Theoretical basis of quantum-mechanical modeling of functional nanostructures // Symmetry. – 2021. – Vol. 13. – № 883. DOI: 10.3390/sym13050883
3. Vakhrushev, A.V., Fedotov, A.Y. The study of nucleation and condensation of nanostructures in the gaseous medium // European Physical Journal: Special Topics. – 2020. – Vol. 229. – pp. 305-314. DOI: 10.1140/epjst/e2019-900105-0
4. Vakhrushev, A., Fedotov, A., Boian, V., Morari, R., Sidorenko, A. Molecular dynamics modeling of the influence forming process parameters on the structure and morphology of a superconducting spin valve // Beilstein Journal of Nanotechnology. – 2020. – Vol. 11. – pp. 1776-1788. DOI: 10.3762/BJNANO.11.160
5. Suvorov, S.V., Severyukhin, A.V., Vakhrushev, A.V. The effect of the angle of «meeting» of fullerite C60 with a solid substrate on the deposition process // PNRPU Mechanics Bulletin. – 2020. – Vol. 3. – pp. 90-97. DOI: 10.15593/perm.mech/2020.3.09
6. Vakhrushev, A.V., Fedotov, A.Y., Savva, Y.B., Sidorenko, A.S. Modeling the processes of atom structure formation of a superconducting spin valve // PNRPU Mechanics Bulletin. – 2020. – Vol.2. – pp. 16-27. DOI: 10.15593/perm.mech/2020.2.02
7. Vakhrushev, A.V. Modeling of interaction nanoparticles with cracks on the surface of solids // Procedia Structural Integrity. – 2020. – 26. – pp. 256-262. DOI: 10.1016/j.prostr.2020.06.032
8. Shushkov A.A., Fedotov A., Vakhrushev A.V. Testing of surface of nanolayer powder carbide tungsten after being treated by laser // materials physics and chemistry. Applied Mathematics and Chemo-Mechanical Analysis. Burlington, Canada. – 2020. – Pp. 137-148.
9. Fedotov A.Yu., Vakhrushev A.V. Study of properties of nanostructures and metal nanocomposites on their basis // Nanomechanics and Micromechanics. – Academic press Waretown. – 2020. – Pp. 17-42.
10. Вахрушев А.В., Федотов А.Ю. Теоретические основы моделирования процессов формирования и взаимодействия наночастиц в газовой среде // Химическая физика и мезоскопия. – 2020. – №1. – С.70-84.
